Chapter 1

Installation Instructions

Before You Begin Installation

The following are pre-requisites to the Mentor Graphics product installation.

1. Check system requirements. For current system requirements, refer to the SupportNet **Download** tab for this release. The release documents are located in the *release_documents* directory on the application DVD/CD ROM or from SupportNet. Additionally, the following web site on SupportNet lists all supported system configurations:

<http://supportnet.mentor.com/systemreqs/index.cfm>

Ordering Licenses

There are no license implications for FloVIZ™.

Downloading Software From SupportNet

1. Create a FloVIZ download directory on your computer. Change to that directory.
2. Using a web browser, log on to the Mentor Graphics SupportNet.
3. Click the **Downloads** tab.
4. In the “My Products” field, choose **FloVIZ**.
5. In the “Selected Release” field, choose **FloVIZ 9.2**.
6. Read the Software Terms and Conditions and select **I Agree** at the bottom before downloading the software.
7. Select the **FTP Download** button.

Note

The following instructions use WinZip as the extraction utility. If you use a different extraction utility, make appropriate selections to ensure that the directory structure of the Mentor Graphics software is preserved.

8. In the File Download pop-up, click **Save** to save the .zip file **FloVIZ_esdm.zip** to your machine.

9. In Windows Explorer, right-click the .zip file.
10. From the pop-up menu, select **Winzip > Extract to**
11. The folder you extract the .zip file into becomes your installation source folder. This folder must not have any spaces in its path.
12. Navigate to the folder to uncompress to.
13. Select “Use Folder names” and click **Extract**.

The data is extracted to the selected location.

14. Follow the instructions listed in “[Quick Install for Windows](#)”.

Quick Install for Windows

Note

On Windows operating systems that support User Account Control (UAC), the user should ensure they have sufficient access privileges when files are written to UAC protected areas.

1. Navigate to the directory where you downloaded the release to. Double-click **FloVIZ_V92_Setup.exe** to start the install program.

If you receive a security error during the download, it’s possible you are dealing with a local security policy. For example:

Devices: Restrict CD-ROM access to locally logged-on user only.

The security policy needs to be disabled through the policy editor, per Microsoft article 290896. Modify the following registry key:

HKEY_LOCAL_MACHINE\Software\Microsoft\Windows
NT\CurrentVersion\WinLogon - AllocateCDRoms must = 0 (zero)

Alternatively, if you are installing from DVD/CD ROM, insert the disc into your drive. If the installation does not automatically start, select **Start > Run**, specify the DVD/CD ROM drive letter and install executable (for example *D:\FloVIZ_V92_Setup.exe*) and click **OK**.

Note

Note: You must have Administrator privileges to install the software products from DVD/CD ROM on Windows systems.

2. Follow the on-screen instructions (generally the defaults are acceptable).
3. You will be presented with a choice of which FloVIZ variant you wish to install, one of:
 - o FloVIZ for FloTHERM

- FloVIZ for FloTHERM (Japanese)
 - FloVIZ for FloVENT
4. Once installed, launch the FloVIZ application from the installation directory, or from the new shortcut in the MentorMA program group.

Support Information

If you have questions about this software release, please log in to SupportNet. You may search thousands of technical solutions, view documentation, or open a Service Request online at:

<http://supportnet.mentor.com/>

If your site is under current support and you do not have a SupportNet login, you may easily register for SupportNet by filling out the short form at:

<http://supportnet.mentor.com/user/register.cfm>
